# LASER HAIR REMOVAL

## SOPRANO TITANIUM™ LASER HAIR REMOVAL FOR WOMEN

The Soprano Titanium is the most advanced laser hair removal system on the market, delivering permanent hair reduction on all skin tones, including tanned skin. Featuring its exclusive 3D technology, the Soprano Titanium combines the three most effective wavelengths in a single applicator, thereby effectively treating different hair types and densities for superior results. The applicator has the patented ICE Plus cold sapphire tip that continuously cools the skin, which minimizes risk and allows the heat to build up gradually and comfortably, making this the most pain-free laser hair removal experience. It is one of our most sought-after aesthetic treatments.

For best results, we recommend a minimum of 6-8 treatments spaced 4-6 weeks apart.

Shave 24 hours before treatment

No exercise for 24 hours

No sauna or steam for 24 hours

No sun, fake tan, UV light for 2 weeks pre or post treatment

No active ingredients or perfumed products for 48-72 hours

## SOPRANO TITANIUM™ LASER HAIR REMOVAL FOR MEN

Laser hair removal for men is fast becoming one of our most popular treatments. This treatment can target thick, deep-rooted hair follicles on all areas of the face and body, including the back, chest, and shoulders, and it can really boost one's confidence and prevent ingrowing hairs and stubble rash. This revolutionary technology delivers unparalleled results with a comfortable sensation.

No active ingredients or perfumed products for 48-72 hours

## HARMONY XL PRO™ ADVANCED LASER TREATMENTS

### HARMONY XL PRO™ ADVANCED LASER TREATMENTS

The Harmony XL Pro™ is an award-winning, powerful, and versatile treatment solution for a wide range of aesthetic needs. Manufactured by Alma Lasers, one of the global leaders in aesthetic (particularly laser) technology, it can be used to target over 65 FDA-cleared indications and provide safe, effective and noticeable results. It combines light, lasers, and a host of other technology to address everything from wrinkles, fine lines, acne vulgaris, vascular lesions, and pigmentation, all the way through to psoriasis.

#### CLEARLIFT™

*Improves skin tone, elasticity, texture, and pigmentation.*

The award-winning ClearLift™ technology is a highly effective skin rejuvenation treatment. Considered a ‘lunchtime procedure’ due to its quick and easy “In-and-out” approach, ClearLift™ is painless, requires no

downtime, and is completely safe for all skin types. Using ClearLift™ 4D, the most powerful Q-Switched Nd:Yag laser technology, allows us to control the exact depth of the treatment which in turn helps to customise and create a bespoke plan to address concerns. This means much more precise treatments and unprecedented results. ClearLift is safe for all skin types, and it can safely treat Melasma as it doesn't generate heat in the skin but uses acoustic "sound" waves to shatter the pigment, helping to create a more even complexion.

*For best results, we recommend a minimum of 6 treatments spaced 2-3 weeks apart.*

AREA	SINGLE	THREE	SIX
Eyes	£210	£490	£875
Half face	£270	£630	£1125
Full face	£360	£840	£1500
Full face & neck	£450	£1050	£1875
Full face, neck & décolleté	£570	£1330	£2375

-  No exercise for 24 hours
-  No sauna or steam for 24 hours
-  No sun, fake tan, UV light for 2 weeks pre or post treatment
-  No active ingredients or perfumed products for 48-72 hours
-  No downtime

## CLEARSKIN PRO™

*Treats acne, acne scars, skin tightening,  
and rejuvenation.*

This award-winning FDA-approved laser offers outstanding, proven results for acne, acne scarring, and skin rejuvenation through powerful energy emission using a non-ablative Er:Glass 1540nm fractional laser. It is the first technology to combine a non-ablative laser with simultaneous contact cooling and vacuum technology to treat acne vulgaris safely by penetrating the skin and destroying the acne bacteria, controlling oil production and reducing inflammation.

At the same time, it deeply penetrates the skin, causing thermal damage and triggering a healing response, which promotes the synthesis of new skin tissue and visibly younger-looking skin.

This is a quick and comfortable treatment without the need for any anaesthesia. It can be done as a lunchtime procedure without any real downtime.

*For best results, we recommend a minimum of 6  
treatments spaced 2-3 weeks apart.*

AREA	SINGLE	THREE	SIX
Half face	£240	£560	£1000
Full face	£330	£775	£1375
Full face & neck	£390	£910	£1625
Body	POA	POA	POA

No exercise for 24 hours

No sauna or steam for 24 hours

No sun, fake tan, UV light for 2 weeks pre  
or post treatment

No active ingredients or retinoid  
products for 7-10 days

Minimal downtime

## CLEARVEIN™

*Treats thread veins, rosacea, facial redness, and flushing.*

Thread veins, sometimes also called spider veins, are tiny veins just underneath the surface of the skin that have become dilated, which means that they are reddish, blue, or purplish in appearance. They can appear on the face and body. ClearVein™ uses a long-pulsed Nd:YAG and DYE-VL laser to target the affected blood vessels beneath the skin, leaving you with smooth, clear skin and renewed confidence. It is also very effective at managing rosacea and facial redness/flushing, and it can also reduce the appearance of red scars, cherry angiomas, port-wine stains, spider naevi, birthmarks, and venous lakes.

For best results, we recommend a course of 4-6 treatments spaced 3 weeks apart for treatment on the face and 6 weeks apart for treatment on the body.

AREA	SINGLE	FOUR	SIX
Nose or small area	£150	£450	£625
Half face	£180	£540	£750
Full face	£270	£810	£1125

Face neck and décolleté	£540	£1620	£2250
Leg vein treatment (30 mins)	£210	£630	£875
Leg vein treatment (60 mins)	£360	£1080	£1500

No exercise for 72 hours

No sauna or steam for 72 hours

No sun, fake tan, UV light for 4 weeks pre or post treatment

No active ingredients or retinoid products for 7-10 days

Redness and possible swelling 48-72 hours

## IPIXEL™ FRACTIONAL ABLATIVE LASER RESURFACING

*Improves texture, tone, and enlarged pores; reduces the appearance of marks and blemishes, such as scarring and stretch marks.*

iPixel Laser Skin Resurfacing is a cutting-edge treatment that revolutionises skin rejuvenation. It works by directing short, intense bursts of laser energy onto the surface of the skin. This heats water within the surface layers, causing both the water and skin tissue to vapourise. With each pass of the laser, microscopic areas (or 'pixels') of the outermost layers of skin are removed in a precise and controlled way. Surrounding skin tissue is untouched and remains intact, which makes for faster healing times.

The body then produces volumes of collagen and elastin to replace the lost skin with new, healthy, and smoother skin tissue. Because the iPixel can be targeted so precisely, it has faster healing times and minimal downtime. This makes it suitable for treating any area of skin on the face and body. It is one of the most effective treatments for scar reduction.

*For best results, we recommend a minimum of 3-6 treatments spaced 6 weeks apart*

AREA	SINGLE	THREE	SIX
Half face	£300	£700	£1250
Full face	£480	£1120	£2000
Full face & neck	£660	£1540	£2750
Body	POA	POA	POA
With exosomes	£150 per treatment		

No exercise for 48 hours

No sauna or steam for 7 days

No sun, fake tan, UV light for 4 weeks pre or post treatment

No active ingredients or retinoid products for 2 weeks

5-7 days of downtime

Topical Anaesthesia not required

## PHOTO-FACIAL™/PIGMENT REDUCTION

Our Photo-Facial uses Advanced Fluorescent Technology to target and break down pigmented areas such as mild sun damage, brown spots, freckles or irregular hyperpigmentation on the face, neck, or even décolleté area. The Photo-Facial also stimulates skin renewal and collagen production, altogether providing a clearer skin tone and smoother appearance. Age spots are the result of an excess production of melanin, or skin pigment. Skin aging, sun exposure, and other forms of UV light exposure, such as tanning beds, are all possible causes. Although true age spots are harmless to our health, many patients visit our clinic to discuss suitable options in treating the spots in order to boost their self-confidence.

AFT laser treatment has proven to successfully break down the age spots, and revitalise the skin with the stimulated production of collagen and elastin. It can be used on the face, hands, shoulders, décolleté, upper back, and other sun exposed areas of the body.

*For best results, we recommend a minimum of 4-6 treatments spaced 3-4 weeks apart.*

AREA	SINGLE	FOUR	SIX
Small area/nose	£150	£450	£625
Half face	£180	£540	£750
Full face	£270	£810	£1125
Full face & neck	£330	£1020	£1375
Décolleté	£350	£1085	£1460
Full face, neck & décolleté	£540	£1675	£2250
Hands	£210	£650	£875

No exercise for 48 hours

No sauna or steam for 7 days

No sun, fake tan, UV light for 4 weeks pre or post treatment

No active ingredients or retinoid products for 2 weeks

Downtime: redness 24-48 hours and pigment will appear darker for 10-14 days

## LASER TATTOO REMOVAL

We use two different lasers to safely breakdown and remove unwanted tattoo ink, and semi-permanent makeup, of all colours. Our Q-Switched Nd:YAG Laser is an advanced laser used to selectively target black, blue, grey and green tattoos, without damaging the surrounding tissue. We also have a 532nm wavelength laser which is most effective for use on red & warm tone colours including violet, orange, yellow and brown. We also have a 532nm wavelength laser, which is most effective for use on red and warm-toned colors, including violet, orange, yellow, and brown.

No exercise for 48 hours

No sauna or steam for 7 days

No sun, fake tan, UV light for 2 weeks pre or post treatment

No active ingredients or retinoid products for 2 weeks

2-4 weeks of healing

*For best results, we recommend a minimum of 6-10 treatments every 8-10 weeks apart.*

<13cm price upon consultation	POA	POA	POA	POA

## ALMA HYBRID™ FRACTIONAL CO2 LASER

This revolutionary treatment combines the most rejuvenating laser, a fractional ablative CO2 laser, with a 1570nm non-ablative fibre laser - two energies which are complementary to each other. It is a more aggressive laser than any of our other lasers because it treats much deeper in the skin but can be customised. Whilst other lasers are good for superficial pigmentation, fine lines, shallow scarring, the CO2 laser can produce more impressive results for deep wrinkles, deep acne scars, sun-damaged skin, hyperpigmentation, unevenly textured skin, stretch marks, and scar reduction. It is particularly popular for tightening loose skin around the upper and lower eyelids. Simultaneously, the fibre laser works with thermal energy to improve collagen and elastin remodelling and thickening of the dermis to help with skin tightening and other signs of ageing. The Hybrid laser is very versatile, allowing us to use more or less of each of the two lasers, depending on what we are trying to achieve, as well as how much downtime will follow.

Immediately following this ablative laser procedure, we use a non-focused ultrasound technology, to push cosmeceutical products and active ingredients deeper into the skin through the micro channels that have just been created. This increases absorption of products by 25%. At this stage, you also have the option of adding exosomes.

*We recommend 1-3 treatments depending on the skin concerns, at 8 week intervals.*

AREA	SINGLE	THREE
Full face	£750	£1675
Full face & neck	£900	£2100
Eyes	£250	£700
Lips	£200	£500
Option to add exosomes	£150 per treatment	

 No sun exposure for 2 weeks pre and post treatment

 No active ingredients or retinoid products for 2 weeks

 Downtime 5-7 days

 Topical Anaesthesia not required

## PRE AND POSTOPERATIVE TREATMENTS

### FULL BODY POST SURGERY LYMPHATIC DRAINAGE MASSAGE

A gentle and therapeutic massage technique that targets the lymphatic system to promote healing and reduce swelling after surgery. This specialised massage aids in the removal of excess fluid, toxins, and waste from the body, enhancing the recovery process. It helps to alleviate discomfort, improve circulation, and restore balance. Experience a soothing and rejuvenating session, tailored to support your post-surgical healing journey and enhance your overall well-being.

SINGLE	SIX	EIGHT	TEN	TWELVE
£200	£1000	£1265	£1500	£1700

*We recommend a minimum of a course of 6 -12 treatments which can begin from 4 days post-op.*

## SCAR REVISION WITH THE ALMA HYBRID™ FRACTIONAL CO<sup>2</sup> LASER

The Alma Hybrid™ is the future of scar revision. Its three powerful energies allows for the treatment of more complex scarring. It is used to treat acne scars, surgical scars, traumatic scars, keloid scars, hypertrophic scars and burn scars. It has a unique technology that uses 3 different energies to maximise results. It uses a CO<sub>2</sub> laser — the highest-powered CO<sub>2</sub> laser on the market currently. It also uses the Er:Glass wavelength that helps stimulate collagen; moreover, it uses ultrasound technology for trans-epidermal delivery of active ingredients into the skin. All settings can be tailored to deliver bespoke results.

SINGLE	THREE	SIX
£250*	£700*	£1250*

*We recommend a course of 3 sessions, spaced 6 -8 weeks apart.*

\*Prices from, depending on size.

-  No sun exposure for 2 weeks pre and post treatment
-  No active ingredients or retinoid products for 2 weeks
-  Downtime 5-7 days
-  Topical Anaesthesia not required

# SKIN

## NEAR-INFRARED (NIR) SKIN TIGHTENING

NIR uses a safe level of infrared light to penetrate the deeper layers of the skin. The light heats the water in the skin tissue and causes collagen fibres to contract and tighten. It also stimulates fibroblasts to repair skin cells and produces new collagen. Immediately after the treatment, you can expect your skin to feel smoother, look more plump, and more radiant. In the long term, firmness of your skin will improve and get better after each treatment. It is a popular skin-tightening treatment because it is painless, and is both relaxing and efficacious.

AREA	SINGLE	THREE	SIX
Face & neck	£200	£560	£1000

*To achieve the best results, a course of 6 treatments, is recommended every 2-3 weeks.*

## FUNGAL NAIL TREATMENT

We use the latest laser technology to target the fungus beneath the nail plate, eliminating the infection with no harmful effects on healthy tissue. With a 80% success rate, this is the most effective way to treat nail fungus and more effective than creams and medication. It also improves the appearance and encourages the growth of a healthy new nail.

AREA	SINGLE	THREE	SIX
1 nail	£80	£220	£400
2 nails	£150	£420	£750
3 or more nails	£225	£630	£1125

*To achieve the best results, a course of 6 treatments is recommended every 2-3 weeks.*

## INJECTABLE TREATMENTS

We offer a select number of advanced injectable treatments. We only provide the market leading brands and all treatments are delivered by an experienced and registered medical professional. Our goal is to enhance your natural beauty and to help you feel like your best self.

## SKINPEN® PRECISION MICRONEEDLING

SkinPen microneedling is the first FDA-approved medical microneedling device. It is proven to be a safe and effective treatment to rejuvenate and restore your skin, and the results last for up to 6 months. It creates temporary, small microscopic channels in the skin, which activates your body's natural skin-healing power to increase collagen and elastin. SkinPen is recommended for the treatment of facial acne scars and for improving the appearance of fine lines and wrinkles, stretch marks, surgical scars, enlarged pores, and pigmentation conditions on the face and body.

-  Redness, swelling, peeling, and flaking can occur for up to four days after your SkinPen® Microneedling procedure
-  Topical Anaesthesia applied

## MORPHEUS8

Morpheus8 combines Radiofrequency (RF) energy and Microneedling to help reshape and contour your skin, creating a smoother and more evenly balanced complexion. Tiny needles puncture the skin, whilst RF energy is simultaneously delivered, creating micro-abrasions that stimulate the body's natural healing response. This promotes new collagen and elastin, resulting in firmer and more youthful skin. Considered the ultimate non-surgical face lift.

## MEDICAL FACIALS

We believe in completely customised skin treatments to achieve the best results. We are able to target the four main skin disorders: ageing, hyperpigmentation, redness and acne. The facials comprise of a variety of different blends of active ingredients and acids, serums and peel-off masks, all of which can be enhanced with 10 minutes of LED light therapy.

## PREGNANCY FACIAL

*A Gentle, Nourishing Treatment for Expecting Mothers*

Specially designed for mums-to-be, this soothing facial deeply hydrates, calms, and brightens the skin using only pregnancy-safe ingredients. Your expert therapist will tailor the treatment to your unique concerns with pHformula products, helping to combat hormonal breakouts, dryness, and sensitivity while promoting a healthy, radiant glow. A truly relaxing and rejuvenating experience for every stage of pregnancy. This treatment is safe for all trimesters and is free from active ingredients & retinoids.

*Treatment Price: £175*

## FULL EXTRACTION FACIAL

### *Deep Cleansing for Clear, Radiant Skin*

Experience a thorough deep cleanse designed to unclog pores, remove blackheads and whiteheads, and eliminate congestion. This treatment combines professional exfoliation with precise manual extractions, followed by a soothing, hydrating mask to restore balance and leave your skin smooth, refreshed, and glowing. Ideal for oily, acne-prone, or congested skin.

*Treatment Price: £150*

## DERMALUX® LED PHOTOTHERAPY

Dermalux is an award-winning LED Light Therapy treatment using Tri-wave (Blue, Red and Infrared) light. It is non-invasive and uses clinically proven therapeutic light energy to trigger the skins natural rejuvenation and repair processes without pain or downtime. Dermalux is suitable for all skin types and concerns. It is a wonderful treatment for those who suffer with acne & congested skin, inflammatory conditions such as sensitivity, rosacea & psoriasis, as well as skin that show signs of ageing & pigmentation. Great as a standalone treatment or as an add-on to any of our facial treatments.

SESSION	SINGLE	SIX	TWELVE
20 Minutes	£75	£375	£660
10 Minutes (add on)	£35	£175	£330

## PHFORMULA CONTROLLED CHEMICAL SKIN RESURFACING FACIALS

*45 Minutes, £200*

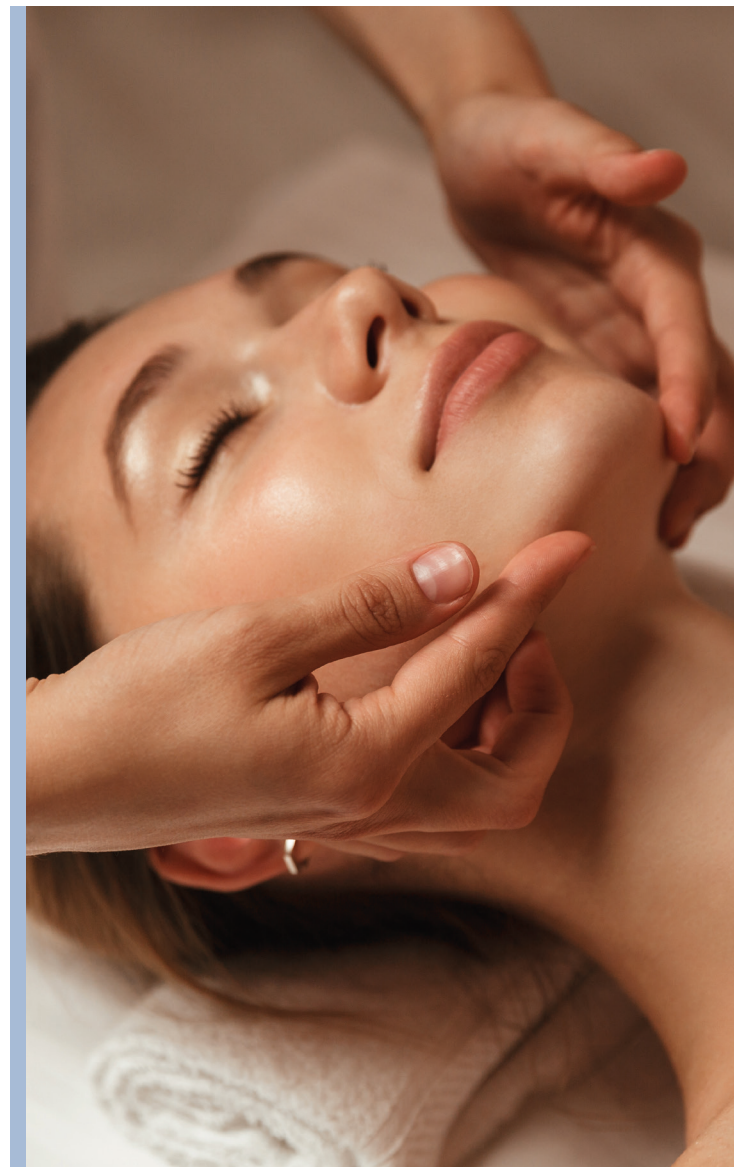

Unlike traditional chemical peels, these skin resurfacing treatments have no downtime, no peeling and no impact on social interactions due to their unique formulation, which allows for a rapid penetration of the ingredients into the skin.

### A.G.E.

An advanced, age-reducing treatment to help correct the typical signs of ageing, including superficial and medium expression lines, photo-ageing, dull/sallow appearance, and pigment changes.

### M.E.L.A. POWERCLAY™

A powerful blend of active ingredients uniquely formulated in a clay base, which assists in the even and rapid penetration of the ingredients. It is specifically formulated to help improve dark spots in all skin types and a variety of hyperpigmentation disorders.

### A.C.

Specifically formulated to improve imperfections, excess sebum, enlarged pores, uneven skin texture and post-inflammatory hyperpigmentation. The A.C. solution penetrates in the skin to assist in clearing skin blemishes and provides an antimicrobial activity in acne-prone skin. It also offers soothing benefits along with a strong keratolytic action (loosening and exfoliation of dead skin cells) to help normalise oily skin.

### V.I.T.A. C RADIANCE BOOST

A uniquely designed treatment, ideal for the summer months or for the ultimate pre-event glow up. Pure L-ascorbic acid powder is dissolved into the pHformula radiance release activator just before application, which ensures maximum vitamin C concentration levels are achieved in a highly absorbable medium.

### C.R. COMPLEX FOR CHRONIC REDNESS AND ROSACEA

A powerful blend of active ingredients, uniquely formulated in a clay base which assists in the even and rapid penetration of the ingredients. It is specifically formulated to help improve dark spots in all skin types and a variety of hyperpigmentation disorders.

### OBAGI BLUE RADIANCE® FACIAL

*30 Minutes, £150*

A quick, superficial salicylic acid-based facial peel that exfoliates and helps improve the overall complexion.

No sun exposure for 48 hours pre and post treatment.

No active ingredients 48 hours before or after treatment.

## COSMELAN® DEPIGMENTATION PEEL

This treatment is the gold standard for treating stubborn pigmentation, including melasma. It has taken the world by storm and is suitable for all skin tones. This premier depigmentation method acts with an intensive corrective effect, regulating melanin overproduction in melanocytes. Its dual action, both corrective and controlling, ensures short and long-term results, eliminating existing hyperpigmentation, preventing reappearance, and stopping the emergence of new dark spots. The Cosmelan method is a unique combination of active ingredients of proven efficacy to enhance the brightness of the skin and to unify the tone. This treatment can work on the following skin concerns: Melasma, Post inflammatory Hyperpigmentation, Solar Lentigos and Freckles. More than 1 million people around the world have already tried it.

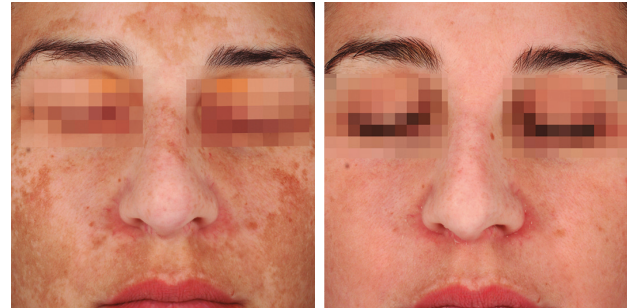

### 12 MONTH PROTOCOL

£2500

*Optimum results are seen after an minimum of 180 days of being on the Cosmelan protocol.*

### WHAT'S INCLUDED:

- A 2 week preparation kit
- Melanostop trns x3 skin preparation peel
- The medical depigmentation in clinic treatment
- The advance depigmenting home care kit which
- Lasts for 12 months
- Full client support for the 12 month protocol
- Including clinic visits

No direct sun exposure to 2 weeks after and SPF to be worn at all times.

No other products to be used for treatment duration

## DERMAMELAN INTIMATE BRIGHTENING TREATMENT

Rediscover your confidence with Dermamelan Intimate, an advanced depigmentation treatment specially formulated for intimate areas. This cutting-edge solution targets hyperpigmentation and uneven skin tone in sensitive regions, promoting a brighter, more uniform complexion while respecting the delicate nature of your skin.

### WHY CHOOSE DERMAMELAN INTIMATE?

- **Targeted Brightening:** Effectively reduces dark spots and discoloration in intimate areas.
- **Safe & Gentle:** Designed for delicate skin to minimise irritation while delivering optimal results.
- **Clinically Proven Results:** Experience visible improvements in skin tone, texture, and clarity
- **Confidence Boost:** Restore balance and feel your best with a brighter, more even complexion.

Reveal a renewed sense of confidence with Dermamelan Intimate—a gentle yet powerful solution for intimate skin brightening.

Treatment Price: £750 (includes 2 homecare products)

## LESION REMOVAL AND ELECTROLYSIS

Advanced Cosmetic Procedures (ACP) using Radio frequency is a quick and safe treatment for many minor skin blemishes. It is used to remove an array of different benign skin lesions on the skin such as: sunspots, skin tags, milia, warts and verrucas, xanthelasma, cherry angiomas and spider naevi. This can be performed on the face and body. ACP blemish removal has an established safety record with minimal downtime and scarring. It is completely non-surgical and non-invasive and can be done during your lunch break.

Electrolysis safely and permanently removes hair from all skin tones. It is the only FDA-approved permanent hair removal treatment. It is a good treatment option for treating unwanted white, grey, red or fine hairs on the face and body that are not suitable for laser hair removal due to the lack of pigment.

*A consultation is required prior to undergoing any treatment and any moles or suspicious lesions must be examined by your GP first.*

*The price will vary based on the size or number of lesions and the area being treated. Pricing will be discussed during your complimentary consultation.*

TREATMENT	FROM
1 lesion	£200
2 lesions	£360
Hair removal	POA

 No sun exposure for 2 weeks pre and post treatment

 No active ingredients 7 day before or after treatment

 Downtime up to 72 hours

 Topical Anaesthesia applied

## SIGNATURE COMBINATION TREATMENTS

## PULSE CLARITY

*ClearLift™ + Clearvein™ + LED*

Through a combination of our 3 most popular lasers, this treatment is specifically designed to achieve a clear glass complexion, as it targets redness, hyperpigmentation and skin texture. It stimulates collagen synthesis to boost skin thickness and plumpness for a more youthful appearance. Pulse Clarity will also reduce general skin flushing and is the ideal treatment for those with rosacea and thread veins who are also seeking a skin-rejuvenating treatment. The end result is skin with a radiant, even and glowing complexion.

AREA	SINGLE	FOUR	SIX
Full face	£400	£1440	£2000

No exercise for 72 hours

No sauna or steam for 72 hours

No sun, fake tan, UV light for 4 weeks pre or post treatment

No active ingredients or retinoid products for 7-10 days post treatment

Redness and possible swelling 48-72 hours.

## ULTIMATE RENU-VENATE

*ClearSkin™ + ClearLift™ + LED*

This trio treatment is the most effective non-ablative treatment to help with transforming the appearance of dull, lack lustre, and ageing skin. Not only will it tackle photo-ageing, it will also help to build collagen and firm the skin. With very limited downtime, this is a great treatment to boost your confidence and combat the appearance of scars, fine lines and wrinkles - particularly around the eyes.

AREA	SINGLE	THREE	SIX
Full face	£550	£1980	£2750

No exercise for 48 hours

No sauna or steam for 48 hours

No sun, fake tan, UV light for 2 weeks pre or post treatment.

No active ingredients or retinoid products for 72 hours

Minimal downtime

## SMOOTH RESURFX

*Clearlift™ + iPixel*

The ultimate combination of both non-ablative and ablative lasers, this treatment helps target photo-ageing, enlarged pores, thickened skin and scarring concerns. The Clearlift laser uses non-ablative, photo acoustic energy to stimulate collagen and elastin and rejuvenates the epidermis through increasing cellular turnover, resulting in firmer, more plump skin. The iPixel uses gentle ablation to resurface the top layer of the skin, improving textural concerns and reducing acne and other scarring. This treatment gives optimal results when done as a course of treatments.

AREA	SINGLE	FOUR	SIX
Full face	£550	£1980	£2750

 No exercise for 72 hours

 No sauna or steam for 72 hours

 No sun, fake tan, UV light for 4 weeks pre or post treatment

 No active ingredients or retinoid products for 7-10 days post treatment

 Downtime 5-7 days

BEAUTIFEYE

ClearLift™ + Nanoneedling + Peptide eye mask

The eye area really shows how good you are feeling within your skin; sleep, diet and ageing all affect this. Often a difficult area to target, this combined treatment works to brighten dark circles, reduce fine lines and thicken delicate, thin skin. We boost collagen synthesis and brighten hyperpigmentation. The icing on the cake is the Peptide gel mask, which cools and calms while also pushing active anti-ageing peptides into the skin.

AREA	SINGLE	THREE	SIX
Eyes	£250	£700	£1250

 No exercise for 48 hours

 No sauna or steam for 48 hours

 No sun, fake tan, UV light for 2 weeks pre or post treatment

 No active ingredients or retinoid products for 72 hours

KISS DON'T TELL

Dermabrasion + ClearLift™ + Candy Kiss peel off mask

Kissable, soft, and plump lips with no needles are now possible with this signature treatment at Pulse. Helping to boost collagen production, remove dead skin cells, and hydrate. We also help to brighten surface pigment around the lip area. This is the treatment you never knew you needed - but you won't want to live without.

AREA	SINGLE	FOUR	SIX
Lips	£125	£350	£625

 No exercise for 48 hours

 No sauna or steam for 48 hours

 No sun, fake tan, UV light for 2 weeks pre or post treatment

 No active ingredients or retinoid products for 72 hours

## EXOSOME THERAPY

*Experience the next level of skin and scalp rejuvenation with Exosome Therapy—an advanced regenerative treatment that accelerates cellular renewal, boosts collagen, and enhances skin health.*

Exosomes are tiny vesicles packed with growth factors and proteins that signal cells to repair, hydrate, and regenerate. When applied to the skin, they promote deep rejuvenation, improve healing, and support a youthful, radiant complexion.

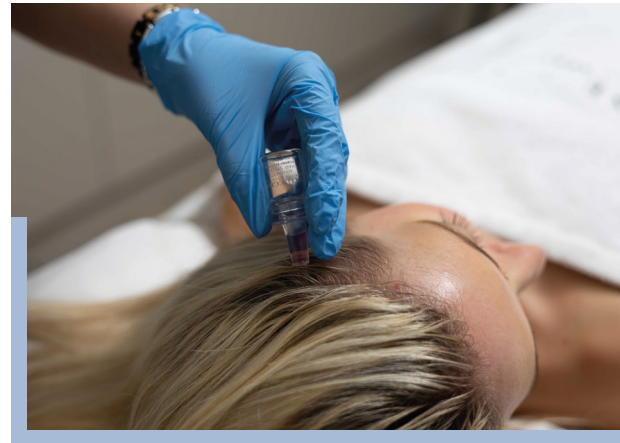

- Benefits include:
- Deep skin renewal & hydration
- Boosted collagen & firmer skin
- Faster healing & tissue repair
- Stimulated hair growth & scalp health

Available as part of our Advanced Hair Restoration Treatment or as an add-on to: SkinPen Microneedling, Morpheus8, Hybrid CO2 Laser Resurfacing, iPixel Laser Resurfacing

*Treatment Price: £150*

## PULSE LASER ADVANCED HAIR RESTORATION

Experience the future of hair restoration with our Advanced Hair Restoration Protocol, a cutting-edge, three-step treatment exclusively designed to promote hair growth, improve scalp health, and stimulate both collagen production and blood flow to the hair follicles. This minimally invasive approach is highly effective for addressing hair loss conditions such as androgenic alopecia, traction alopecia, and hormonal hair thinning.

OUR THREE-STEP PROTOCOL

- 1. Scalp Microneedling with Calecim Professional Serum. The first step involves precise scalp microneedling combined with Calecim Professional Serum; a potent stem cell-based formula derived from umbilical cord lining extract. Rich in growth factors, glycoproteins, fibronectins, and collagens, Calecim supports tissue repair, cellular regeneration, and reactivation of dormant hair follicles. Microneedling creates controlled micro-injuries in the scalp, stimulating natural collagen production and enhancing the absorption of active ingredients. Your practitioner will apply 50% of the Calecim serum during this stage to maximise its regenerative effects.
- 2. Next, we use the Alma Impact Trans-Epidermal Delivery System, an innovative technology that uses low-frequency, non-focused ultrasound waves to create temporary micro-channels in the skin. This enhances the penetration and efficacy of active ingredients deep within the scalp. The remaining 50% of the Calecim serum is applied during this step, ensuring optimal absorption and effectiveness in stimulating hair growth.

- 3. Dermalux Light Therapy. The final step involves Dermalux Light Therapy, featuring red and near-infrared light to improve blood circulation and stimulate hair follicles. This increased blood flow delivers essential nutrients directly to the follicles, promoting healthier, stronger hair growth. Clinical studies have shown that red light therapy can significantly enhance hair density and thickness.
